

# LEGO® Education MoreToMath Thanksgiving Shopping

## KEY

	10	1
Brown	Turkey legs	
Red		Cranberry sauce
Green		Salad
Orange	Pumpkin pie	
Tan		Bread
Purple	Stuffing	

Let's practice making some numbers first!

Let's model 25 with the LEGO Bricks.

Choose a color that represents 10. What could we choose?

(Brown, orange, Purple)

How many do we need? (2)

Place them in the tens column on the LEGO base plate.

Now choose a color that represents 1. What could we choose?(tan, green, red)

How many do we need? (5)

Place them on the LEGO base plate in the ones column.

Count: How many ones do we have and how many tens do we have. Count 10,20,1,2,3,4,5= 25

Now we are ready to shop!

Using the KEY chart that tell us how much each item is worth we will build numbers from our shopping list for Thanksgiving.

Write your own problem from the information provided in the key. Make a chart to show how you would solve your problem.
