

Fourth of July Fireworks!

Samantha went to the park with her family to watch fireworks to celebrate the Fourth of July. They saw 5 purple, 12 red fireworks, 6 green, 9 white and 8 blue fireworks. Create a bar graph below that shows this information. Be sure to include a title and labels for each axis. Then answer the questions at the bottom. Happy Independence Day!

Purple

Questions:

1. Which color fireworks was used the most? _____
2. How many red and purple fireworks were there together? _____
3. How many fireworks did Samantha see in all? _____
4. Which firework color was used the least? _____
5. How many more red fireworks were there than white? _____
