

TEN OR ONE HUNDRED: CUBE GAME

DIRECTIONS: For this game, you will need a cube with the following sides: + 10, -10, + 10, -10, +100, and -100. You can play by yourself or against another person. Each person starts with the number 500. Roll the cube. Write the number in the second column (If you roll “-10,” write “-10”). Then write the entire equation in the third column (for example, “500 – 10 = 490”). The answer in the equation becomes your number for the second line/round. If you are playing by yourself, set a goal and see if you can end up with more points than your goal. If you’re playing against someone, the person with the highest points at the end of the game wins.

NUMBER	NUMBER ON CUBE	EQUATION
500
