

TEACHER LETTER

Money Minute

Dear Educator,

Money skills are one of those things that could always use some reinforcement. With that in mind, we specially designed these Money Minutes for students in grades 2 and 3 for use after instruction. We've included five worksheets here so you have enough to take you through a full school week. Each day, the problems follow the same format but get progressively more challenging. Here are some ideas for how to use them:

1. **Whole-group practice:** Put a worksheet up on your interactive whiteboard and work together to solve the problems.
2. **Entry task:** As you transition into your math block, use this daily task to get kids focused.
3. **Small-group work:** This can be a great intervention for students who need support with money skills.
4. **Homework:** Send this as at-home practice!

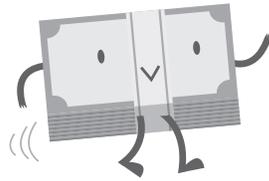

Enjoy,

Your friends at WeAreTeachers
and Regions Next Step

Money Minute

#1

Name: _____ Date: _____

1. Which has the same value as 10 pennies? Circle it.

2. Add the coins.

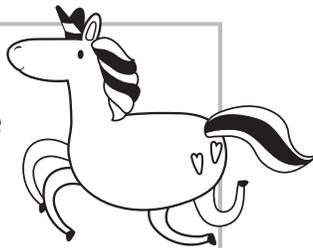

_____ ¢
